Specification

The examiner has not checked the specification to the extent necessary to determine the presence of **all** possible minor errors (grammatical, typographical and idiomatic). Cooperation of the applicant(s) is requested in correcting any errors of which applicant(s) may become aware of in the specification, in the claims and in any future amendment(s) that applicant(s) may file.

Applicant(s) is also requested to complete the status of any copending applications referred to in the specification by their Attorney Docket Number or Application Serial Number, **if any**.

The status of the parent application(s) and/or any other application(s) cross-referenced to this application, **if any**, should be updated in a timely manner.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 5, 7 and 10 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 10-12 of U.S. Patent No. 6,740,156. Although the conflicting claims are not identical, they are not patentably distinct from each other because they differ from one another only in that the instant claims refer to a "drying agent" and the patented claims recite an "inert carrier substance". The instant claims recite cement as the "main" ingredient, whereas the patented claims are silent regarding any relative proportions. However, there is clearly little substantive difference between the two sets of claims and they are considered to be drawn to substantially the same inventive concept.

Allowable Subject Matter

Claims 1-4, 9, 11-24 are allowable over the prior art **considered** by the examiner. Claims 6 and 8 are objected to as being dependent on a rejected base claim. Applicant should note however, that the examiner has only considered German document DE 100 14 468 to the extent it was described in the instant specification and is having this document translated because of the discovery of an English abstract that indicates that sand may be a component of the mixture. Additionally, US 6,740,156 refers to DE 201 19 021 which may have some bearing on the instant invention. A translation of this document has also been requested by the examiner.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant is advised that any evidence to be provided under 37 CFR 1.131 or 1.132 and any amendments to the claims and specification should be submitted prior to final rejection to be considered timely. It is anticipated that the next office action will be a final rejection.
